STATE	WAR	NAVY	JUSTICE						

1. At the end of 1946 the monthly production of armored force vehicles in the Leningrad area was approximately 3,000.
2. The Stalino Tractor Works are situated 8 kms north of Stalino (47°58'N, 37°45'E) and extend for 12 kms in roughly a NW - SE direction. Power is obtained from the station at Rasdorsk on the Don (NE of Rostov, approx. 47°30'N, 40°45'E). The works are connected by rail with the south, where there are various coal and wood deposits.

Comment:

Rasdorsk is a considerable distance from Stalino, but it is possible that it is being used as a source of power only until the new station is built and the Stalino area is reconstructed.)

3. A factory producing uniforms for the Red Army is situated at Tula. Six thousand workers are employed, including 2,500 - 3,000 German and Austrian PWs. New machinery arrived from Germany in the spring of 1946.
4. A tank factory at Stalino (47°58'N, 37°45'E) was working day and night shifts in the autumn and winter of 1945. Daily output was seven or eight tanks of the Stalin and T-34 types. Eight thousand workers were employed.
